

Presents a **FREE TRAINING** for EI Providers,
EEC Childcare workers and WRCP Parents

*Fetal Alcohol Spectrum Disorders:
Early Childhood Red Flags and Opportunities*

**Presented by Enid Watson, MDiv. Of
Institute for Health and Recovery, Inc.**

At the end of the training, participants will:

- **Recognize** the most common manifestations of FASD in the 0-3 population at different ages.
- **Be** able to name at least 3 common “red flag” behaviors that might suggest an FASD dx.
- **Be** able to describe at least 3 neurological symptoms that commonly present in ages 0-3.
- **Have** a working knowledge of possible evaluation tools.
- **Be** more comfortable discussing maternal prenatal alcohol use with bio/foster/adoptive parents.
